Carlton

THE HAND-MADE CYCLE

To cyclists the world over the name 'Carlton' stands supreme for hand-made cycle design, construction and finish.

It is Carlton policy, however, to supply our machines only through Carlton dealers, who have been selected for their interest in cycling and their ability to give satisfactory service.

A genuine hand-made cycle is lively and responsive. This is one reason why Carlton cycles are chosen and ridden successfully by so many leading riders in international competitions.

Enquiries for custom built machines are invited. Consult your authorized Carlton dealer and obtain the special order form

IMPORTED BY RALEIGH INDUSTRIES OF AMERICA, INC., BOSTON 34, MASS.

and distributed only through authorized Carlton dealers and jobbers. Specifications subject to alteration without notice.

CATALINA

(All Chrome)

Carlton

Since its introduction the Catalina has proved to be one of the most popular Carlton models produced due to the very attractive appearance and design. For 1962, further improvements have been introduced as the specification now includes the lightweight Carlton design Capella lugs, and newly designed Capella Oval front forks.

This model has grown in popularity as Carlton chrome is becoming more and more recognized for its mirror finish and durability, and this model has been further enhanced with either Red or Blue flamboyant mitred heads and seat panels.

Specification (Basic)

Frame sizes: 21" or 23". Capella lugs. High Carbon frame tubes. Oval section forks, $2\frac{3}{8}$ " rake.
